PRODUCED/UPDATED:	30 JANUARY 2025

You intend to purchase an investment product that is not categorised as a non-complex one and may therefore be difficult to understand.

WHAT IS THIS INVESTMENT PRODUCT?

Type: This is a forward exchange contract (FX Forward), a special type of over-the-counter (OTC) derivative foreign currency (forex) transaction concluded specifically to exchange currencies.

Term: The expiry date of PRIIP is pre-defined, when concluding the contract, for the purpose of holding the contract until maturity.

The nature of the product: FX Forward is a contract to exchange a certain amount in one currency for a certain amount in another currency at an agreed-upon forward exchange rate, at the specified settlement date. FX Forward is a binding contract whereby the counterparties exchange a pre-defined amount in one currency (nominal amount) for a certain amount in another currency at a certain exchange rate (forward exchange rate) on a pre-defined settlement date.

On the settlement date, the following scenario is implemented: the investor is obligated to exchange the nominal amount according to the forward exchange rate. The following example illustrates the terms of FX Forward and is provided for informational purposes only. These are not the terms agreed upon between you and JSC "Rietumu Banka" (here referred to as Bank). Precise terms will be described in the confirmation of each individual transaction. The illustrative terms are used in devising further execution scenarios and calculating the costs.

Recommended Holding Period: this product is designed to be held until maturity (settlement date). Neither an investor, nor Bank can terminate the contract (to end the product) easily before maturity. However, the product contract specifies certain situations in which an investor can terminate the transaction before its maturity. This is done by concluding an FX Forward in the opposite direction. The costs involved in concluding the opposite transaction depend on market situation and market liquidity and therefore cannot be exactly predicted. You can incur substantial extra costs or losses if you terminate the product earlier than the agreed maturity date.

INTENDED RETAIL INVESTOR

This product is intended for the following investors who are:

- interested in hedging currency risk and are ready to hold the product until maturity;
- have sufficient knowledge and prior experience of foreign exchange trading;
- ready and able to bear loss that exceeds the original amount invested;
- ready to take on risk whose level corresponds to the summary risk indicator (as shown herein below) on highly speculative markets.

This product is intended for retail investors who are interested in hedging a foreign-exchange position and leverage trading and are able to cover losses may exceed the initial investment, which may arise from market fluctuations, while not placing focus on capital protection.

WHAT ARE THE RISKS AND WHAT COULD A GET IN RETURN?

! The summary risk indicator (SRI) assumes you keep the product for 6 (six) months. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You can incur substantial extra costs if you terminate the product earlier than the agreed maturity date.

The SRI is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because Bank, as the product manufacturer, is not be able to pay you.

The risk scale gives the product a score from 1 to 7. We have classified this product as 7 out of 7 which points to a very high-risk category. This product points to probability of very high potential losses from future market performance. Unfavourable market conditions are not likely to affect Bank's ability to pay in your favour.

Please be aware of currency risk. You should take into consideration the existence of currency risk. As you will receive payouts denominated in other currency, your final return ratios depend on the exchange rates of the both currencies. This risk is not considered in the SRI shown above. This product does not include any protection from future market performance. So, you could lose some or all of your investment. If Bank is unable to repay its debt owed to you, you could lose all of your investment.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios presented herein are illustrations and are based on past performance and assumptions. Markets could develop very differently in the future.

	THE RECOMMENDED HOLDING PERIOD:	6 MONTHS
SCENARIOS	EXAMPLE OF THE NOMINAL AMOUNT: EUR 10 000	IF YOU CASH IN (EXIT) AFTER 6 MONTHS (THE RECOMMENDED HOLDING PERIOD)
MINIMUM	NO GUARANTEED MINIMUM RETURN (GMR). YOU MAY BE REQUIRED TO MAKE FURTHER PAYMENTS TO PAY FOR LOSSES.
